

Brainstorming & Idea Prioritization Template

Date	07 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	JS	Design the Entity Relationship Diagram and define the application architecture.	System Design	
2	NH	Plan the project workflow, project flow, download the dataset, and develop Random Forest & XGBoost models.	Planning & Model Development	
3	PP	Import the dataset, perform EDA (Univariate, Bivariate, Multivariate), handle missing values, and develop the KNN model.	Data Analysis & Machine Learning	
4	VN	Balance the dataset and perform feature	Data Preprocessing	

		scaling before model training.		
5	NA	Collect project links, references, and prepare the project conclusion and documentation.	Documentation	
6	Entire Team	Integrate all modules into a Flask web application and deploy the Smart Lender system.	Integration	

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Develop a machine learning-based loan approval prediction system using Decision Tree, Random Forest, KNN, and XGBoost models.	High	High	12	Yes
2	Build a Flask web application to provide	High	High	2	Yes

	real-time loan approval predictions using the trained XGBoost model.				
3	Deploy the Smart Lender application on IBM Cloud for easy access by banks and financial institutions.	Medium	High	3	Yes
