Project Name	Smart Lender
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
- We need an accurate loan prediction system. - Every team member should complete their assigned module. - The final application should be user-friendly and reliable.	- Which machine learning model will achieve the highest accuracy? - Is the dataset clean enough for training? - Will the Flask application work smoothly with the trained model?

	PERSONA NAME <i>(Role / User Type)</i>	
DOES • Designs the application architecture. • Performs data preprocessing and exploratory data analysis. • Builds and evaluates machine learning models.		FEELS • Confident while completing assigned tasks. • Curious about model performance. • Satisfied after successfully integrating the complete application.
